Naveen Hitnalli

Full-Stack Developer

+91-8904912385 ◇ naviihitnalli@gmail.com ◇ India ◇ LinkedIn ◇ GitHub ◇ Portfolio

SUMMARY

Python Full Stack Developer with hands-on experience in building scalable, high-performance web applications using **Flask, and FastAPI**, along with working knowledge of the **MERN stack**. Strong expertise in **backend architecture, database design (PostgreSQL, MySQL, MongoDB), and performance optimization**. Proven track record of improving API efficiency by **30%**, reducing response latency. Skilled in **authentication systems (JWT/OAuth), CRUD operations, API integration, and responsive UI development**. Experience working in **Agile environments** with **Git, GitHub Actions (CI/CD), Docker (basic), unit testing, and code reviews**. Adept at developing production-ready applications with clean, maintainable, and test-driven code. Seeking backend or full-stack roles to build reliable, scalable, and impactful software solutions.

EXPERIENCE

Web Development Intern(MERN) May '25 — Aug '25
Infotact Solutions Bengaluru, India

- Collaborated with the web development team to **design, develop, test, and deploy** responsive websites and web applications.
- Wrote **clean, efficient, and maintainable code** using **HTML, CSS, JavaScript, React.js, and Node.js**.
- **Troubleshot and debugged** issues to optimize performance and enhance user experience
- Learned and implemented **new tools and frameworks** to improve project efficiency.

Python Developer Intern Nov '24 — May '25
APlus Topper Hyderabad, India

- Developed backend modules using Django and Flask for high-traffic web applications.
- Designed RESTful APIs that improved frontend-backend communication efficiency by 30%.
- Reduced API response time by optimizing SQL/PostgreSQL queries and indexes.
- Automated weekly reporting and data processing using Python scripts, saving 10+ hours/week.
- Participated in Agile development sprints, code reviews, and Git-based version control.

Python Developer Intern - Web Development May '24 — Jul '24
Tech Fortune Technologies Bangalore, India

- Developed full-stack apps with Django/Flask backend and responsive UI using HTML/CSS/JS.
- Constructed robust PostgreSQL schemas for transactional data, reducing database storage cos ts by 10% and streamlining data access for reporting and analytics teams.
- Automated report generation and log parsing with Python, reducing error rates.
- Used GitHub for version control, performed unit testing, and fixed cross-browser UI bugs.

SKILLS

Programming Languages Python, JavaScript, MERN Stack

Web Frameworks & APIs Django, Flask, Fast API, RESTful APIs, Jinja2, React.js (basic), Node.js (basic)

Databases MySQL, PostgreSQL, MongoDB .

Tools & DevOps Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Postman, Docker (basic), GitHub Actions, Chrome DevTools

Professional Skills API Integration, Debugging, Agile Development, Unit Testing, CI/CD, CRUD Operations, Authentication (JWT/OAuth), Deployment, Code Review, Communication Skills, Strong time management, teamwork in agile environments, strong problem-solving and critical thinking abilities

Hardware & Fabrication Skills

- **Autodesk Fusion 360:** Basic 2D sketching and 3D CAD modeling
- **3D Printing:** Understanding of STL file preparation and slicing workflow
- **Laser Machines:** Basic knowledge of laser cutting and engraving processes

- **CNC Router:** Familiar with CNC machining workflow and basic G-code concepts
- **Electrical Fundamentals:** Basic wiring, circuit understanding, and electrical safety
- **Digital Fabrication:** Basic knowledge of manufacturing workflow from CAD design to physical prototype
- **AgriTech Awareness:** Basic understanding of agriculture technologies and smart irrigation concepts.

PROJECTS

Hyper local-service-marketplace May '25 — Jul '25

- Hyperlocal Service Marketplace (Urban Company Clone) A full-stack MERN (MongoDB, Express, React, Node.js) web application that allows users to register, book local services (like home cleaning, plumbing, etc.), and make payments securely. Providers can list services, manage bookings, and track users. Admins can view all data in a dashboard.

Flex_Fuel_Wear Shop Apr '25 — May '25

- Developed a full-stack custom T-shirt printing platform using MongoDB, Express.js, React, and Node.js with JWT authentication and role-based access (Admin, Designer, Customer).
  Implemented product customization, cart, order management, and RESTful APIs for secure transactions and scalable data handling.

EDUCATION

MCA in Computer Applications, BEC Bagalkote(GPA: 8.9/10) Dec'24-Jul'26

BCA in Computer Applications , CES Vijayapura(GPA: 9.0/10) Oct'21-Oct'24
